Company
Profile

About Us

Who we are...

We are an ISO certified company comprising a group of engineers with combined experience of 30 years in the construction industry. We came together to start this venture in 2018.

We're reliable manufacture (processor), supplier, importer and exporter. We are deals in Building Materials and Technology Development, and Environment-Friendly materials. Global supplier of processed Cenosphere, Hollow Ceramic Microsphere, Hollow Glass Microsphere, Talc and exporters of cementitious materials viz. Ultra-Super Pozzofine M-500, Cenosphere, Silica fumes & GGBS. We offer a range of allied services to the Oil-Drilling & construction industry.

MKB International Exports has started processing and selling Cenosphere & cementitious materials from the year 2018. it is registered as a completely Export-oriented entity and exporting Cenosphere to USA, EUROPE and MIDDLE EAST

Our products are highly admired for their quality. These are obtainable at best market prices. The offered products are processed using optimum quality raw materials under stiff surveillance by our adroit experts.

We have a strong team with high technical, infrastructural and logistical capabilities. As we manufacture cementitious materials, our services also include offering options of cement replacement products and Cenosphere (oil & Drilling) to our clients.

We export material as per composition need of the client. All the building materials & Cenosphere manufacturer (processor) and exporter by us undergoes Physical & Chemical tests in order to export the best quality of Cementous material.

Our mission:

To become a leader in processing and marketing of Cenosphere & cementitious materials in the world in most cost-effective way.

Our vision:

To explore the various applications of Cenosphere in different industrial cycles and to

Philosophy :

Keep ahead in quality, reliability and services.

Objectives :

To provide High quality products and services to our customers.

R & D

Research & Development.

In India, a considerable amount of fly ash is released year after year from its coal-fired power generation plants. Only 10% of Cenosphere and fly ash is used in the building and construction industry. This is amongst the lowest ash utilization done by any country.

The large quantities of Cenosphere and fly ash create a huge pressure on environment & organizations involved in waste management. We at MKB International Exports are working towards minimizing this impact by finding ways to effectively use Fly ash and Cenosphere. For achieve the same we've set up R & D department that is continuously studying about the potential industry applications of Cenosphere.

We have created a reserve from the share of our revenues for continuous up-gradation of R&D department dedicated to studying the mechanical and thermal properties of Cenosphere, to find new ways of using this environmentally sustainable mortar as an innovative cementitious material to

Our R & D site is equipped with qualified and trained staff & state of art in-house facilities of Quality Control, training, assembly, & relevant services. It keeps an eye on the changing technology & requirements which assists us in serving our clients' evolving needs. We're equipped to fulfil your Cenosphere requirement in India and across the globe.

We're amongst foremost green manufacturers in the Industry. Adapting green practices in the most effective and innovative manner and doing our bit in reducing the carbon footprint in the environment We have created a reserve from the share of our revenues for continuous up-gradation of R&D department dedicated to studying the mechanical and thermal properties of Cenosphere, to find new ways of using this environmentally sustainable mortar as an innovative cementitious material to achieve sustainability and possibility.

Quality Policy

We are maintaining consistent quality standards in services, delivery and enhanced within an independently assessed quality management system.

We are highly focused on Supply products and Service to meet agreed specifications and requirements.

Our Quality improvement program Comprises of...

- **Meet Customer requirements.**
- **Focus on prevention and risk management.**
- **Continuous improvement of methods, tools and skills.**
- **Continuous Supplier Development.**
